

LEADTOOLS Medical Product Line
Runtime Licensing Schedule

LEADTOOLS Medical Imaging and LEADTOOLS Medical Imaging Suite (“LEAD SDK”) require runtime licensing based on your use/deployment of the end user application you develop using the applicable LEAD SDK (“Application Software”). LEAD offers a variety of licensing models designed to allow our customers the flexibility to make their medical software endeavors as successful as possible. If none of the following licensing models satisfy your requirements, we work with you to develop a licensing program that will fit into your business model. Contact oesales@leadtools.com to further discuss licensing options.

Option 1 - Per Copy Pricing Model

The basic licensing model for the LEAD SDK requires that a runtime license be purchased for each “Deployment” of the Application Software developed with the LEAD SDK. A “Deployment” of Application Software includes: (i) each copy of the Application Software installed by customer for internal use and (ii) each copy of the Application Software distributed to third parties by customer and its resellers/distributors. If the Application Software is installed on a network or server by customer or any of customer’s licensees, a runtime license is required for each computer that is connected to the network or server having access to the Application Software. One (1) runtime license is included with the initial purchase of the LEAD SDK. **The cost of additional runtime licenses is \$100.00 per copy in the case of LEADTOOLS Medical Imaging and \$150 per copy in the case of Medical Imaging Suite.** Customers also have the option of purchasing runtime licenses in **prepaid** quantity blocks:

Medical Imaging (Basic Dicom)			Medical Imaging Suite (Communication/Security Enabled)		
<u>Quantity Prepaid</u>	<u>Price Per Copy</u>	<u>Prepayment</u>	<u>Quantity Prepaid</u>	<u>Price Per Copy</u>	<u>Prepayment</u>
50+	\$60.00	\$3,000.00	50+	\$125.00	\$ 6,250.00
100+	50.00	5,000.00	100+	100.00	10,000.00
250+	40.00	10,000.00	250+	75.00	18,750.00
500+	30.00	15,000.00	500+	50.00	25,000.00
1,000+	20.00	20,000.00	1000+	40.00	40,000.00
2,500+	15.00	37,500.00	2500+	30.00	75,000.00
5,000+	10.00	50,000.00	5000+	20.00	100,000.00
10,000+	7.50	75,000.00	10,000+	15.00	150,000.00

Option 2 - Per Copy Pricing Model with CD Burn License

This licensing option is for stand alone Application Software that has CD Burn capability. Under this license a user may install the application on a single stand alone PC, and in addition, the PC user will have the right to redistribute a read only Dicom viewer module along with a CD of Dicom images which are burned by the Application Software; provided the viewer may only display Dicom images from the CD.

Medical Imaging

<u>Quantity Prepaid</u>	<u>Price Per Copy</u>	<u>Prepayment</u>
<50	\$110.00	n/a
50+	70.00	3,500.00
100+	60.00	6,000.00
250+	50.00	12,500.00
500+	35.00	17,500.00
1,000+	25.00	25,000.00
2,500+	20.00	50,000.00
5,000+	15.00	75,000.00
10,000+	10.00	100,000.00

Option 3 - Client/Server - Concurrent User Model

Customers also have the option of purchasing runtime licensing based on concurrent use or simultaneous access of the Application Software. Under this approach, Application Software that is installed on a network or server requires a license for each computer that has concurrent or simultaneous access to the Application Software. For example, if a customer has a network with 50 computers that are connected, but only 5 of the computers are permitted to access the Application Software at the same time, only 5 runtime licenses must be purchased. **The cost of concurrent runtime licenses is \$200.00 per copy in the case of LEADTOOLS Medical Imaging and \$300 per copy in the case of Medical Imaging Suite.** Customers also have the option of purchasing concurrent runtime licenses in **prepaid** quantity blocks as shown below.

Medical Imaging			Medical Imaging Suite		
<u>Quantity Prepaid</u>	<u>Price Per Copy</u>	<u>Prepayment</u>	<u>Quantity Prepaid</u>	<u>Price Per Copy</u>	<u>Prepayment</u>
50+	\$120.00	\$6,000.00	50+	\$250.00	\$12,500.00
100+	100.00	10,000.00	100+	200.00	20,000.00
250+	80.00	20,000.00	250+	150.00	37,500.00
500+	60.00	30,000.00	500+	100.00	50,000.00
1,000+	40.00	40,000.00	1000+	80.00	80,000.00
2,500+	30.00	75,000.00	2500+	60.00	150,000.00
5,000+	20.00	100,000.00	5000+	40.00	200,000.00
10,000+	15.00	150,000.00	10,000+	30.00	300,000.00

If customer is selling a client/server solution commercially, customer may combine licenses for discounting purposes. For example if customer has 5 licensees to each of whom customer has granted 10 concurrent licenses to use the Application Software, customer could purchase a prepaid block of 50 concurrent licenses.

Option 4 - DICOM Server License - Third Party Client Software (Medical Imaging Suite/ Dicom Communication only)

For customers developing a DICOM server that will reside solely on a single networked machine, but which may be accessed by multiple users who are using third party software (software that does not include any of the libraries included in the LEAD SDK), these customers will have the option of purchasing Server Licenses for each server the Application Software is installed on. By purchasing a server license, no additional licensing will be required for the computers accessing the Application Software residing on the server. A Server License is never a requirement. Customers always have the option of selecting licensing based on options 1 or 2 above. A Server License is appropriate where the Application Software is installed on a server with the potential for a large number of users accessing the server with third party software, and customer does not distribute any LEAD SDK libraries to the users accessing the Application Software.

<u>Quantity of Server Licenses</u>	<u>Price Per Server</u>
1	\$7500.00
2	7250.00
3	7000.00
4	6500.00
5	6000.00

Option 5 – Web Server License – Third Party Client Software (Medical Imaging only)

For customers developing Application Software to be installed on a web server that will reside solely on the server but which may be accessed by multiple users who are using third party software (software that does not include any of the libraries included in the LEAD SDK), these customers will have the option of purchasing Web Server Licenses for each server the Application Software is installed upon. By purchasing a server license, no additional licensing will be required for the computers accessing the Application Software residing on the server. A Web Server License is never a requirement. Customers always have the option of selecting licensing based on options 1 or 2 above. None of the features contained in Medical Imaging Suite (such as Dicom Communication and Dicom Security) may be enabled on a Web Server. For Dicom Server license options, see section 3 above.

<u>Quantity of Server Licenses</u>	<u>Price Per Server</u>
1	\$1000.00
2	950.00
3	900.00
4	825.00
5	750.00

Option 6 – Duplication Station License - Read Only Dicom Viewer

In some situations, a customer may have the need to generate/save Dicom files and distribute the files on a physical media for display to patients and health care professionals. For customers developing a DICOM file creation module for inclusion on work stations with CD duplication capability (“Duplication Station”), a special license is available that permits the duplication and distribution of a DICOM read only viewer developed using the LEAD SDK (“Dicom Reader”). Under this license, the customer may install the Application Software on one work station per license purchased and may copy and redistribute the Dicom Reader on CDs containing DICOM images created using the Application Software. The Dicom Reader may only be run from the CD and may not be installed by the recipient or copied and redistributed by the recipient. In addition, the Dicom Reader may only be used to display the Dicom files that are contained on the CD. Duplication Station Licenses may be purchased at the following prices:

<u>Quantity of Duplication Station Licenses</u>	<u>Price Per License</u>
1	\$1000.00
5	900.00
10	800.00
25	700.00
50	600.00

A Duplication Station license may be purchased in connection with other license options described above. For example, customer may have a client/server imaging solution that includes a Duplication Station. In such a case, customer might purchase per copy or concurrent runtime licenses for some modules of its system and a Duplication Station license(s) for the Duplication Station component.

Option 7 - Quantity Unlimited Licenses

Quantity unlimited licenses are available for single and multi-year license terms. With a quantity unlimited license, a customer may deploy or distribute an unlimited quantity of copies of the Application Software and will not be required to purchase or report on a per user/per copy basis. Quantity unlimited licenses are quoted on a case by case basis after customer and LEAD have exchanged information concerning customers development projects.
